Connecting Education and Workforce Data: RI's Statewide Longitudinal Data System

Board of Education

February 22, 2022

RHODE
ISLAND

Summary

- Rhode Island has a statewide longitudinal data system (SLDS) that connects individual-level data from early childhood, through postsecondary education, and into the workforce.
- This system, operated and maintained by DataSpark at URI, is one of the most robust and mature SLDSs in the country. It's a powerful tool to help policymakers make data-driven decisions.
- All three agencies (RIDE, OPC, and DLT) participating in the RI SLDS are working together on a bill to institutionalize the system in statute and create structures for its long-term sustainability and growth.

What is a statewide longitudinal data system (SLDS)?

The US Dept of Education's Statewide Longitudinal Data Systems (SLDS) Grant Program helps states and territories make informed decisions to improve student learning and outcomes by designing, building, maintaining, and expanding P-20W+ (early childhood through workforce) longitudinal data systems.

- The SLDS Program was established by the Education Technical Assistance Act of 2002
- A total of 135 grants have been awarded since the first grant round in 2005

million**
in total grants awarded

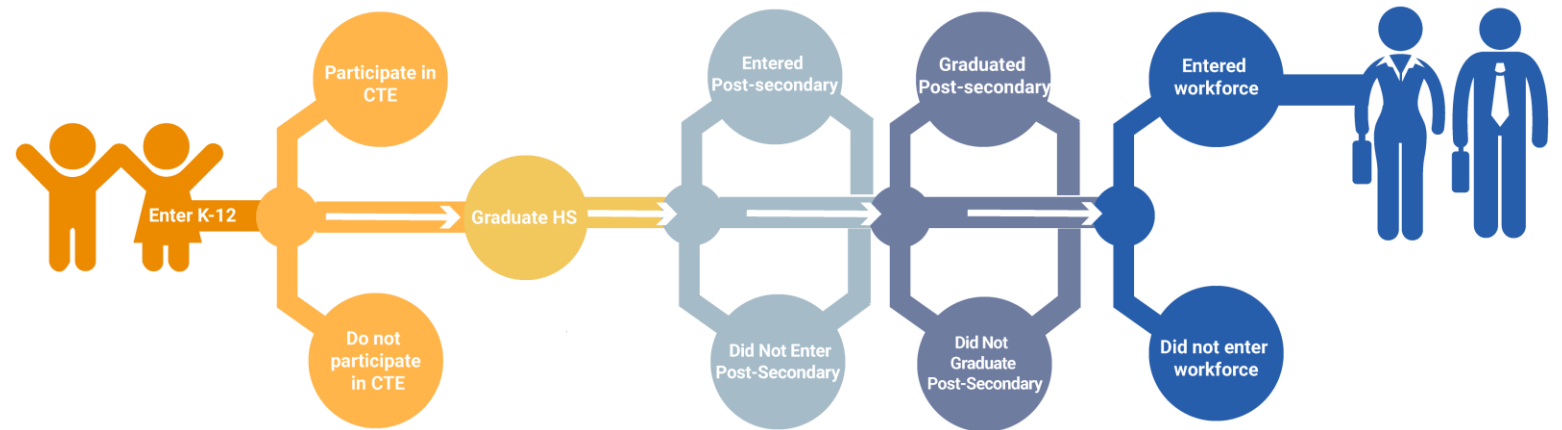

Overview of Rhode Island's SLDS

Between the SLDS and U.S. Department of Labor's parallel Workforce Data Quality Initiative grant program, Rhode Island has received 6 rounds of federal grant funding, totaling \$16.7 million.

DataSpark maintains and operates Rhode Island's statewide longitudinal data system (SLDS). For **nearly 30 years**, DataSpark has used the power of data to inform, empower, and inspire innovative decision making and research. The RI SLDS links previously siloed data using a proprietary **machine learning algorithm**, custom-built by DataSpark.

The Importance of a Sustained, Stable SLDS

Linking across agencies allows new information and patterns to emerge, cross-agency collaboration to evolve, and new insights to be discovered.

The RI SLDS is a state resource, supporting the state's policy and decision-making priorities. DataSpark leverages the RI SLDS to **answer policy questions** and **support research** around education and workforce outcomes, **evaluate programs** and **measure investments** in education and workforce development, and improve the lives of Rhode Islanders.

Chronic Absenteeism: Intervention and Prevention

Chronically Absent (C.A.) = missed 18 or more days of school

Documenting an educational “brain drain”

The RI SLDS of Today

DataSparks exists to foster the use of integrated, longitudinal data for research, evaluation and cross-sector problem solving.

- What are the annual wages of Career & Technical Education (CTE) participants after graduating from high school?
- Do teen mothers enroll in and then graduate from college?
- Does Rhode Island retain the health care graduates our public, postsecondary institutions train?
- How does lead exposure impact the need for special education services?
- Which industry-recognized credentials offer its participants the highest return on investment?
- Graduates from which majors are most likely to find employment out-of-state?

The RI SLDS of Tomorrow

The RI SLDS can inform policymaking and support program evaluation related to career pathways, economic opportunities, healthcare access, housing stability, and more.

- All three pipeline agencies (RIDE, OPC, and DLT) and DataSpark have established an interagency data sharing agreement, naming DataSpark as the authorized representative and research partner of the State's education and workforce agencies, as required per the Family Educational Rights and Privacy Act (FERPA) and other federal and state laws.
- To maximize benefits to the State, they have drafted legislation codifying the RI SLDS.
- This legislation formalizes governance structures, ensuring trust and transparency among stakeholders, and eliminates duplicative shadow data systems, providing a better return on state investment.
- Once codified, the RI SLDS can receive sustainable, predictable funding to support participating state agencies.
